

Key emerging air legislation (International and European)

Emerging policy areas	Notes
Directive (2001/81/EC) on National Emissions Ceilings	Revisions due 2011-2012. The proposal to amend the NECD is still under preparation and should set emission ceilings to be respected by 2020 for the four already regulated substances and for the primary emissions of PM2.5 as well.
Directive (2010/75/EU) on Industrial Emissions (Integrated Pollution Prevention and Control) (Recast)	This combines Directives on Waste Incineration, Solvent Emissions, Large Combustion Plants and Titanium Dioxide Production into one single legal document. This proposal also builds upon the original concepts contained within the IPPC Directive and require further controls on emissions from prescribed industrial activities to be achieved.
Protocol to the UNECE Convention on Long Range Transboundary Air Pollution (UNECE Gothenburg Protocol)	Revisions likely
